
Project Profiles - Banners and Signs

Below is a promotional poster located in Melbourne, Victoria that is protected with Guardian's Water Based coating. This is not only used for improving presentation, but as well as providing protection against graffiti.

Project Profiles - Banners and Signs

The promotional vinyl banners below were coated with Guardian's Water Based coating and then wrapped around air conditioning ducts. This shows how versatile and flexible Guardian's coatings are. The banners were situated in front of a sports stadium in Melbourne, Australia to provide protection against graffiti.

Project Profiles - Banners and Signs

This poster in Melbourne, Victoria is located in an area subject to graffiti and vandalism, and as such is protected against attacks by Guardian's Water Based coating. Guardian's Water Based coating does not only provide protection, but also helps maintain the quality of the poster.

Project Profiles - Banners and Signs

The photograph below shows a Vinyl banner protected by Guardian's Water Based coating that has been coated off site, rolled and then is being fixed in position on a site in South Yarra, Melbourne, Victoria. Guardian's Water Based Coating provides not only protection against graffiti, but also superior protection against the elements.

Project Profiles - Banners and Signs

The photographs of traffic signs in Portugal below, shows just how effective Guardian's Water Based coatings are at removing graffiti. Guardian's coatings have been tested for reflectivity and we provide a warranty on the performance.

Project Profiles - Banners and Signs

Guardian's Coatings were used to protect this sign at Bardwell Park Train Station in Sydney, New South Wales.

Project Profiles - Banners and Signs

As these before and after photographs show, Guardian's Protective Coatings when applied to signs in areas subject to graffiti attack provides an easy surface to clean.
