
Project Profiles - Freeways and Bridges

Guardian's Products have been used on many freeways throughout Australia, New Zealand and Europe.

There are a number of reasons for choosing Guardian including:

- Anti Carbonation certified – prevents concrete cancer.
- Anti Graffiti certified.
- Option of various finishes, for example the matte is used when head light reflections are an issue.
- Low odour water based products are ideal for construction sites.
- Available in a variety of colours and finishes.

Below is a photograph of a freeway in Mandurah, Western Australia that has been coated with Guardian's Permanent coating.

Dawesville Cut Bridge

Project Profiles - Freeways and Bridges

Guardian has been specified and used freeways and bridges throughout Western Australia including Roe Highway, Mitchell Freeway, Kenwick Freeway Link, Eddystone Freeway Bridge and Dawesville Bridge.

The following are photographs below are from the Roe Highway project in Perth, Western Australia.
