## Project Profiles - Playgrounds

---

The Playground below is located in Sydney, New South Wales. The Playground equipment including the mural is protected by Guardian. The coating will protect against graffiti and is abrasion resistant. The UV additives will provide protection against the sun and prevent the colours from fading.

---

## Project Profiles - Playgrounds

---

Both Guardian's coatings and the UV additives will perform in a water playground environment as with these colourful coated "characters" exposed to the water and the elements.

---

## Project Profiles - Playgrounds

---

The Guardian coatings can be tinted to the required colour. As with this playground in Sydney, the play equipment can be applied as one system. Graffiti can then be removed using Guardian removers.

---

## Project Profiles - Playgrounds

---

The Guardian coatings can be used to protect a variety of surfaces like this playground in Portugal – contact us for or visit our website for our specification sheets.
