
Project Profiles - Trains, Buses and Trams

Guardian have produced a Manual for Protection of Transport vehicles that is an easy guide to coating of the various surfaces on vehicles – both internal and external.

The surfaces that can be protected using our recommended coating system include but are not limited to:

- o Metal Substrates
- o Plastic Substrates
- o Polyester Substrates
- o Plastisol Coated Substrates
- o PVDF Coated Substrates
- o Aluminium Substrates
- o Powder coated Surfaces
- o Stainless Steel Surfaces
- o Pre painted Substrates
- o Vinyl Seat Backs
- o Vinyl Floors
- o Vinyl Floors – with option to include non skid additive
- o Plastic Advertising Posters
- o New Vehicles – External Panels
- o Old Vehicles – External Panels

Project Profiles - Trains, Buses and Trams

The coating of this train, the Volker Stevin, in the Netherlands is an indication of the finish achievable with Guardian Transit Guard and the variety of colour tints available.

Project Profiles - Trains, Buses and Trams

The protection of STCP buses in Portugal involves both cleaning and protection, and thanks to Guardian have achieved their desired targets. These before and after photographs show just how effective Guardian is.

Project Profiles - Trains, Buses and Trams

The maintenance of these trams in Portugal gives a clear indication of the importance of clean trams to the city image, and the use of Guardian's fine range of products help achieve this.

Project Profiles - Trains, Buses and Trams

Guardian's graffiti removers are used to maintain The Great Southern Railway in Australia, one of Australia's largest train networks.

Project Profiles - Trains, Buses and Trams

Guardian coatings were also used to protect the Metro Station in Hannover, Germany.

Project Profiles - Trains, Buses and Trams

Guardian coatings were used by New South Wales Train Authority to protect their train stations including this station in Sydney.

Project Profiles - Trains, Buses and Trams

Guardian coatings have been used to protect train stations in the Netherlands that are subject to regular graffiti and require an easy clean solution.

Project Profiles - Trains, Buses and Trams

Guardian removers are used to clean the plastic covers on goods trains in the Netherlands that are subject to pollution, collect dirt and require an easy clean solution.

Project Profiles - Trains, Buses and Trams

Guardian's Graffiti Removers and Water Based Coatings were used to clean and protect these Roteb train carriages in the Netherlands that were subject to regular graffiti attacks and required an easy clean solution.

Project Profiles - Trains, Buses and Trams

Guardian's Water Based Coating is being applied direct onto the floor surfaces of this train without the need for a primer.
